

Every time your campers go in, WAVE makes sure they get out safely.

Dramatically reduce your risk around water.

WAVE is a wireless portable drowning detection system created to enhance your staff's efforts to discover a swimmer at risk before the event can escalate.

WAVE works at indoor and outdoor pools, lakes and beachfronts—anywhere superheroes are needed.

Contact us today at info@wavedds.com to schedule a one-on-one Zoom call to learn more.

WAVE gives your guards more than just their eyes and ears.

Using comfortable lightweight wearables, WAVE accurately measures how long each swimmer's face is fully submerged. If any are at risk, WAVE immediately notifies your guards via vibrating bracelets, a flashing strobe light and optional speaker.

- Reliable proven technology
- Wireless and portable, no installation required
- Works in pools, lakes, beaches, rivers, etc.
- Very low impact on daily routines
- Customizable including discreet alerts
- 1000 foot coverage radius
- Intuitive wearable storage & distribution
- Surprisingly affordable monthly terms

"19% of drowning deaths in the US involving children occur with certified lifeguards present" – American Camping Assoc.

Wearables approved by 1000s of the toughest testers: Humans.
